

Weaving Twigs

Materials: twigs with interesting branching or shapes
yarn
other natural found items (leaves, feathers, dry flowers)

Method:

1. Have students bring in items for construction, choosing their twig carefully for weavable shaping and thickness. Choose twigs already broken off the tree.
2. Using the twig as your loom, weave the yarn around the branches to form a pattern of your choice.
3. Insert other collected items.
4. Hang on or lean against a wall, or suspend from the ceiling as a mobile.
