HARVESTING IMAGE MATCH

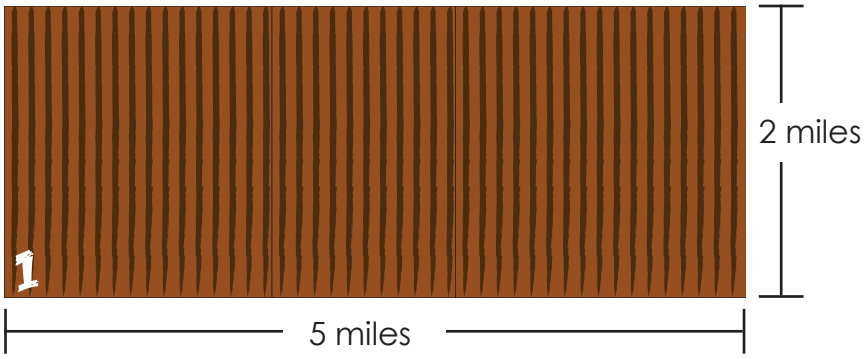
DIRECTIONS

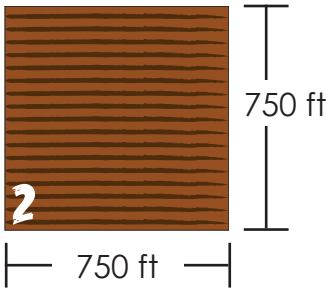
On the top are pictures of harvesting equipment. Below is the name of each harvester. See if you can match the equipment with the correct definition. Draw a line to show your work.

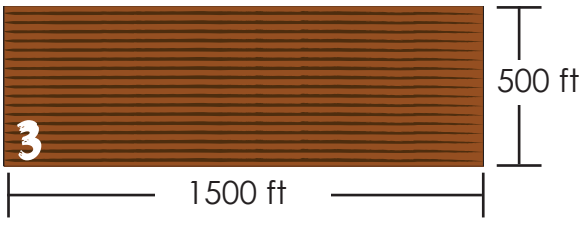
A Ride-on-water Cranberry Harvester	**B** Cotton Picker: Used to harvest cotton	**C** Combine: Used for harvesting grain and corn	**D** Potato Harvester

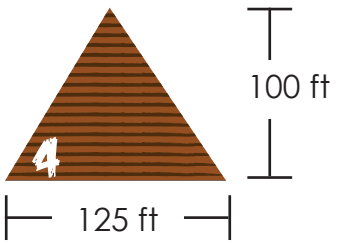
DIRECTIONS

Cotton is called a "perennial" plant because it grows for more than 2 years. Imagine you are a cotton farmer, and you need to plant your fields. Before you plant, you must know the area of each field! Calculate the area of each field below and show your work.









BONUS!

You have a triangle-shaped piece of land left. Calculate the area!

Answers: (Part 1): 1) C 2) A 3) B 4) D (Part 2): 1)10 square miles 2) 562,500 square ft 3) 750,000 square ft 4) 6250 square ft
