

Name: _____

Date: _____

Consuming Cows

The average cow weighs one thousand four hundred pounds. Cows drink twenty five to fifty gallons of water each day. A female cow produces over two hundred thousand glasses of milk in her lifetime. What a cow eats affects the milk that it produces. If a cow has a balanced diet, she can produce as much as one hundred glasses of milk per day. Spots on cows are like fingerprints on humans. No two cows have the same exact spots and no two humans have the same exact fingerprint.

Circle the correct answer after reading the passage.

1. Cows are very _____ (large, small)
2. How many gallons of water might a cow drink in a day? _____ (1, 40, 100, 500)
3. Which two things are similar?

(Cow spots, tails, fingerprints, milk, water)
4. What is the type of diet that enables a cow to make 100 glasses of milk a day?
_____ (Balanced, unbalanced)

Name: _____

Date: _____

Answer Key

1. Large
2. 40
3. Cow Spots, Fingerprints
4. Balanced
