Honeybee

Read the passage below and answer the following questions.

Honeybees are the only insect world that makes food that people can eat. In a beehive, there are three kinds of bees – the queen, the workers, and the drones. The queen's one and only job is to lay eggs. The worker bees build cells for the baby bees, take care of the babies and keep the hive clean and tidy. They also collect pollen and turn it into honey, which is food for the bees. The drones' one and only job is to mate with the queen.
